

D V 6NR

Industrial Diesel Engine

DV6 NR

- 1560 cc
- 4 cylinders in Line
- Common Rail
- Turbo with Intercooler
- 47 kW @ 3 000 rpm
- 180 Nm @ 1 750 rpm
- Weight : 130 Kg

- *Lightweight*
- *Low Vibrations and Noise*
- *Performance*
- *Low Emissions*
- *Economical*
- *Compact*
- *Durable*
- *Environment Friendly*

The DV NR benefits from all the experience PSA has gathered from the production of more than 1 million High Pressure Common Rail Diesel engines.

Thanks to its advanced engine architecture, computer controlled fuel injection management, DV NR complies with EURO Stage 3B and TIER 4 Final standards without DPF, it's fuel efficient, and is low noise and vibration.

All the parts of the DV engines have been studied with high durability level in mind. The weight of all the moving parts has been minimized, leading to improved engine performance as well as overall engine efficiency.

The oil maintenance of the DV can adapted with an optional larger sump.

* Certification in progress
