

Industrial Diesel Engine

D W 10 NR

DW10 NR

- **In Line 4 Cylinders**
- **1997cm³**
- **Common Rail**
- **Turbo with Intercooler**
- **56kW @ 3000rpm**
- **210Nm @ 1750rpm**
- **155kg**

- **Lightweight**
- **Low Vibrations and Noise**
- **Performance**
- **Low Emissions**
- **Economical**
- **Compact**
- **Durable**
- **Environment Friendly**

The DW10 NR benefits from all the experience PSA has gathered from Common Rail Engines (HDI) and more than 1 million engines produced with this technology.

Thanks to its electronic fuel injection management, DW10 NR complies with EURO Stage 3B and TIER 4 final standards without DPF, is fuel efficient, is low noise and vibrations.

All the parts of the DW engines have been studied with high durability level in mind. The weight of all the moving parts has been minimized, leading to improving performance as well is reduced fuel consumption.

The oil maintenance of the DW is can be adapted with an optional larger sump.
